(54) MOBILE OBJECT COMMUNICATION EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To prevent an earphone-microphone from becoming an obstacle and to eliminate the entanglement and cutting of the cord of the earphone- microphone even if being held in a hand in carrying by fixing the position of the earphone-microphone by a holding means provided in a device body.

SOLUTION: An antenna 12 is incorporated at the upper part of a case 11, a speaker 13 and a liquid crystal display plate 14 are incorporated at a front surface upper part, a push button 15 is incorporated near a front surface center and a microphone 16 is incorporated at a front surface lower part. The earphone-microphone 20 is provided with an earphone 21, a microphone 22 and the cord 23. The cord 23 of the earphone-microphone 20 is pulled from a hole 32 provided on the right side face of the case 11 into the inside of the case 11 and wound to the reel of an automatic winding mechanism and then, an end part is electrically connected to a printed wiring board. When carrying, the cord 23 of the earphone-microphone 20 is housed inside a telephone set body 10 and the earphone 21 and the microphone 22 are positioned

automatically wound around a reel inside the case 11. The earphone 21 and microphone 22 are positioned on the left side of the case 11. The cord 23 is pulled through a hole 32 on the right side of the case 11 and wound around a reel inside the case 11. The case 11 has a rectangular shape with a speaker 13 at the top and a liquid crystal display plate 14 in the center. A push button 15 is located near the center of the front surface. A microphone 16 is located at the bottom left of the front surface. An antenna 12 is located at the top left of the front surface. The earphone 21 and microphone 22 are located on the left side of the front surface. The cord 23 is attached to the earphone 21 and the microphone 22. The case 11 is shown in perspective, with the front surface facing the viewer.

near the bottom surface of the telephone set body 10. Thus, the earphone-microphone 20 does not become the obstacle.
